## The "new" Dr. Josef Mengeles!? "Doctors, experts and psychologists" stand firm for „Jugendamt“ s and FA courts

Willing doctors, "experts" and psychologists serve the morally reprehensible child abduction of the „Jugendamt“ s and family courts. For most, it's a really good deal. Many of those affected compare this to the National Socialist child molester Dr. Josef Mengele. From May 1943 to January 1945, Mengele was employed as a camp doctor in the Auschwitz-Birkenau concentration camp. In this capacity, he carried out selections, supervised the gassing of the victims and carried out inhumane medical experiments on prisoners and especially on children. As is the case today, the perpetrators were not aware of any guilt. Not knowing anything or acting on orders is the common excuse. A special act of brutalization for the administrative handling of a putian child abduction by the Bergisch Gladbach „Jugendamt“ has now been afforded by the Rhineland Regional Association. The

Doctors in National Socialism. The darkest chapter in the history of German medicine. And today again? Picture: NDR

psychologist, child and adolescent psychotherapist (VT), Joelle Vollertsen, of the LVR clinics

At the request of the paying staff of the „Jugendamt“ , Bonn has stomped the child's parents into the ground in a totally deviant way.

### **Dr. Josef Mengele with child victims of medical experiments.**

Especially the successor organization "Landchaftsverband Rheinland" of the Rhenish Provincial Association, which was involved in the persecution of undesirables and the euthanasia of disabled people in many institutions, should know its history before it signs vile "diagnoses" in the form of death sentences for today's „Jugendamt“ s and family courts.

## Therefore, an open letter to those responsible in the Rhineland Regional Association and the LVR Clinics Bonn.

**Brauweiler Memorial of the LVM**  
**The Use of the Workplace by the Secret State Police – The LPR Yesterday and Today?**

Hello the ladies and gentlemen of the LVR clinics in Bonn and the LVR press office,

It was with horror that I read the Multidimensional Area Diagnostics Social Pediatrics for the child Y. Haddad born 12.9.18 created on 14.12.23 written on 27.02.24 to Pat. ID: 69123. Earlier in 1933, these "Multidimensional Area Diagnostics of Social Paediatrics"

were a question of work or euthanasia – in other words, a part of "redemption". Already at the first indications of the alleged clinical picture I rubbed my eyes in amazement. After all, the child, who is said to be so severely damaged, has not been in the household of the child's parents for almost 2 years. Has nothing positive happened for the child in the household of the paying staff, whom you incorrectly call foster "parents"?

I have been following this case from the beginning. **The brutality of the Bergisch Gladbach „Jugendamt“ against the Haddad family is simply scandalous.** I made a film about it, which was initially deleted at the instigation of the city of Bergisch Gladbach. [Film : Bergisch Gladbach „Jugendamt“ scandal due to gratuitous child abduction.](#)

My countless publications on the Haddad „Jugendamt“ scandal case have even brought me **a fine proceeding for alleged "defamation and insult"** by the **allegedly** "insulted" and "persecuted" of the „Jugendamt“ **GL. And this despite the fact that we are constantly called upon by politicians to stand up for weak people.** The proceedings were finally discontinued because there were offers of evidence that called into question the strategic penalty order, not only with the political goal of banning my mouth, but also quite obviously too time-consuming for the judge to deal with in a public trial. Because there was evidence that the removal was carried out out of lies and exaggerations, vile and full of meanness. [A Christmas letter to the „Jugendamt“ Bergisch Gladbach from the Haddad / Mogultay family ! Stop copying King Herod!](#)

[to the blog](#)

# JustizSkandale

by Heinz  
Faßbender

In addition, children from financially weak families could now be cashed in, because the Corona and lockdown had ended. Why not in the Corona lockdown period, with this alleged serious child welfare problem, which was very burdensome for many families in particular, it remains **hidden in the darkness of the alleged data protection**. [„Jugendamt“ s and family courts abuse data protection to protect public offenders!](#)

They insinuate post-traumatic stress disorder. Why the child suffers from this, you do not know at all. They simply assume, without justification, that the child's parents are to blame. Have you ever wondered what it means for a child to be snatched away from a father and mother at a very young age with uniformed police officers and haunting youth welfare women and men? Do you actually know that the visitation contact with the child was constantly reduced for no reason by the paid

judicial and official responsible persons just like that? Again and again something is conjured up in order to achieve an alienation. The sponsors of the visiting regulations have thwarted visits with impossible demands. Nothing about this appears in your diagnosis. Has the child who was looking forward to the visit and the parents were forced not to come – become sick? Can you even imagine what that means for such a young child? What a burden it is for children – not being able to see their mom anymore?

"WE WILL BE BACK  
NOTHING  
HAVE KNOWN!"

They just as scandalously insinuate "possible experiences of violence" – without even justifying them. Maybe there is no proof after all! But it

[to the blog](#)

# JustizSkandale

by Heinz  
Faßbender

is in the diagnosis and in further diagnoses it is no longer "possibly", but only "experience of violence". Or what do you mean by that – with the "possibly"? The "eventual" is then linked to this by further claiming that the child's parents have inflicted "violence" on each other. Where? Even in front of the children? Do you have any evidence to support your claim?

They further claim that all 6 children were taken away from their mother.

**Oh, that's right! All 6 siblings?**

This is simply not true. This, too, becomes your truth through further expert reports or diagnoses – which then means: all children had to be taken away from the Haddad family.

It's as simple as writing a financially weak family to death.

Note: With the help of the same „Jugendamt“, which has now taken 4 children from the family with brute force under scandalous reasons and insinuations, 3 children of Mrs. Haddad were raised at the current age of 25, 20, 19 years - but with a different pedagogically trained clerk. All of them are going their own way and have integrated themselves as taxpayers.

**What all the children had to be taken away? What nonsense you are conveying!**

**All children abducted in the social euthanasia program of the „Jugendamt“ s of the "democratic constitutional state"? I've had it all. Everything is known.**

This "nice clerk" has moved to another department after a "new employee" – who has obviously left the „Jugendamt“ in the meantime because of the publication about his person and his strange level of

[to the blog](#)

# JustizSkandale

by Heinz  
Faßbender

education – had taken over the Haddad family matter. ([See my publications](#)) Unfortunately, this person, as one can say today, took over the case – because then it would not have happened as it did.

They obviously copy from a [family report of the Hans Herrmann beer brewer \(Olpe district\)](#) and define it as a medical diagnosis with the word "possibly". Do you actually know what you are doing with your copying?

In the light of my publications, it is a disaster what you are doing to the family and especially to the children with your unscientific diagnoses. It is irresponsible to produce something like this without talking to the family. You are committing crimes against people who cannot defend themselves – because they do not understand your style of speech at all. It's a secret language of doctors, civil servants and lawyers – and you need funding to decipher these linguistic death sentences. Parents do not have these means.

They insinuate that the father allegedly took drugs. Do you have any evidence for this? He has presented drug tests – the lawyers and educators don't care at all. Hit it like hell – we are the halo bearers of the rule of law and are always right. All that is needed are willing doctors or psychologists who justify this state arbitrariness with their secret language, and the world is again "completely constitutional state" in arbitrary order. **Nothing** is right, the ladies and gentlemen of the clinic – to live with a Hippocratic oath to live medical knowledge for the benefit of the patient and to improve health care in order to be able to provide treatment at the highest level.

## THE WORST THING IS, WHEN YOU'RE BEING LIED TO AND YOU KNOW THE TRUTH.

If this family were to be supported – as has happened in the past – by family helpers – also with financial means – which today flows to a church institution of € 250 per daily rate and child, this act of lawless inhumanity against the family could have been spared. With all its vile means, the state has trampled on the family and the children who are now suffering – and perhaps produced a new generation of people who will later fight this country and this arbitrariness with weapons or join radical organizations. Then you can – then the state – hit its produced victims again.

It is simply impossible to assume that parents who are poor, who live in cramped quarters, who have had to endure strokes of fate, even health problems, and who are still there for their children – even today –

**Freistatt. The "pedagogical" concept for the "care" of young people at that time included accommodation in remote institutions in the countryside as well as heavy physical labor. In 1899, youth welfare education began in Freistatt with an educational home for boys. Corporal punishment, sometimes to a drastic extent, was a common means of education in Freistatt – as well as in other youth welfare institutions at the time. The Rhineland Regional Association also operated such "prisons".**

assume that they are not capable of raising children or who are not committed.

The authorities and the family court that have caused this disaster are simply brutalized to the point of malicious, devoid of moral values and as exalted as being able to come down from their high grate and admit mistakes, like Mr. Putin or other rogue state leaders. – But not the parents, who cry every day for their children and run their heels off in order to be able to take them in their arms again and that all this is institutionally prevented.

And if today there is the statement by all of you that the children are "sick", then you should ask yourself whether you are responsible for the largest share of the mental and physical disorders of the children, the parents, the siblings and relatives with your halo of the alleged rule of law, as the axis of evil of a criminal child abduction association.

Almost 10 years ago, I sat in the Rhineland Regional Association with an official who apologized for the experiences I had to endure in the home education from 1960 to 1980s. You will no doubt be aware that the LVR has administered part of the Institutional Children's Compensation Fund on behalf of the Federal Government. At that time, we had to work in public home education without pay or pension payments, and thus this fascistic home education was partly financed. We were beaten and raped – in Catholic institutions of "youth welfare" in the spirit of the Inquisition. To this day, the Church has not adequately compensated for these actions. [And this "whitewashing" is now being spread by the landscape association to its own fault against former children in homes and continues in a subtle way as before.](#)

Faßbender

**Doctors in National Socialism. The darkest chapter in the history of German medicine. And today again?**

Every German generation has had to compensate the victims for its "constitutional atrocities" – just read the minutes of the Wannsee Conference. Today's opera will have to compensate future generations who had nothing to do with it.

You, as a medical profession of the Enlightenment, should not fall back into the terrible gray patterns of the past. You know that today's institutions of the Regional Association were involved in the euthanasia of the disabled. That should be a lesson to you for today's actions, to break the rod over people.

Before you fabricate such madness – such a death sentence against the parents and to this extent against the children and the child's well-being – you should have listened to the parents and the children – and indeed all children – including today's adults and also relatives – even had to –

in order to guess only rudimentarily – what a great injustice was done to this family. Let the "file" (uncleaned) from the „Jugendamt“ come to this scandalous matter – you too, if you still have a spark of humanity, will rub your eyes.

## Comparable to today's "new" and "old" thinking?

You can now say – what does he want – and then data protection comes along in a fabricated way – we know that well enough. Data protection then becomes the protection of public officials.

Get the affected people together – and then they will have to revise your diagnostic madness. Alleged "parents" who, after two years, are not able to alleviate the suffering of the children entrusted to them, should ask themselves whether it is their fault and whether it is better to cooperate with the biological parents.

**In my blog, I am currently dealing with 4 serious cases of injustice that have something to do with child removal and child endangerment. In all cases, doctors are involved.**

In this case Haddad, a [family report of Hans Herrmann Bierbrauer \(district of Olpe\)](#) was involved, who used sentence building blocks in another case. In this number, a mother's child was taken away because a doctor at the University Hospital of Düsseldorf suspected abuse. However, on a proper examination of the documents, the alleged abuse turned out to be diaper dermatitis. The mother has still not had her child back for 3 years – although the case for abuse has been dropped. A „Jugendamt“, whose leadership has made fat business with the accommodation of children and young people by founding its own straw man youth welfare agency – has arranged for the child to be taken away – at the call of a false diagnosis. Today, the mother continues to be harassed as a felon by the „Jugendamt“ and the "Youth Welfare Agency" with visiting difficulties. She hasn't seen her child for 8 months because of the sentence building block expert mentioned above. The authorities

know all this – but nothing happens. [Mother Anna Weber had even turned to the Landschaftsverband Westfalen-Lippe](#) because of the lack of supervision of her child by the „Jugendamt“. As usual, just standard answers, shrugs of the shoulders and put the file back in the basement. Here is the article on the scandal case: [An innocent mother is tortured as a felon by the Stuttgart „Jugendamt“ and her accomplices. No sense of guilt on the part of the perpetrators!](#)

Another case is equally scandalous. The magistrate sends an expert 25-year-old juvenile criminal files that should have been destroyed long ago. From this, the psychologist concocts an inability to raise the child's father, with the proviso that the children 10 and 14 years of age should immediately go to the home. The mother is then also taken into custody and certified as incapable of raising children. [Secret deportation](#)

Faßbender

[meetings every day in Germany: „Jugendamt“ and family courts abduct children from intact families!](#)

**The modern building of the district court of Straubing, in the old spirit of gray German history.**

A Berlin mother is confirmed by 3 different diagnoses that the child's father has obviously abused the son. The „Jugendamt“ complains and considers it outrageous that the mother has expected her child to undergo these examinations. An LKA psychologist has no idea how to interrogate a child, let alone understand it at all – and finds no abuse. And because the mother still adheres to the medical diagnoses – including those of the Charité – the abused child was transferred to the alleged perpetrator for "further treatment" by "family court" order due to the mother's intransigence to let everything happen in silence. A contemporary opinion has not been sought for years. The public prosecutor's office remains inactive in obstructing the prosecution. No revolt of the doctors who found the abuse. The lake rests quietly in the

Enlightenment – as it does in the case of intuitions and the churches. Hallelujah can be shouted! [In the case of the Berlin judiciary, there is a vicious brutalization beyond all limits of what is still tolerable. Enlightenment: No thanks.](#)

**Charité is an exception in this case. But where is the outcry for the protection of an abused child who must continue to stay with the alleged rapist by official decision?**

All of this is Federal Republic madness. Children, parents and relatives, indeed society as a whole, are enormously harmed by this. Such "state behaviour" helps to ensure that the powerlessness of those affected

[to the blog](#)

# JustizSkandale

by Heinz  
Faßbender

turns into hatred and terror against the institutions . We are experiencing this more and more at the moment!

**Landschaftsverband Rheinland has always been a place of concealment and cover-up. According to the advertising motto: "Quality for people".**

That is why I call on you, as a great institution of the Rhineland, to think about putting an end to this madness.

For example, through specialist conferences and further training for your colleagues and the stubborn employees in the offices. To this end,

the "old" moral values should once again be conveyed – that every child is better off with the family – than in a foreign country or in institutions that have not yet come to terms with violence and abuse against children and adolescents and regard children and young people as human capital.

It's not because of the money – that's always there for the institutions – it's just because of good will and a change in thinking.

Even in the case of the battered Haddad family, to whom you have accused all evil – but nothing good – you have to reconsider your diagnosis and reassess the case. You owe it to your oath.

I'm sure I'll hear from you in the near future.

After 14 days, I will publish this letter as an appeal on my blog.

Thank you for your attention.

Ladies and gentlemen,

Ignorance is the biggest and ugliest form of contempt and says a lot about the other person. In the meantime, civilisational communication should also have found its way into the authorities. The fact that you, as authorities, press offices and civil servant doctors, are not in a position to confirm the receipt of my e-mail speaks volumes about the state of this country between the authorities and the citizens. If citizens were to behave in this way, they would sometimes have to reckon with considerable consequences, from arrests (GEZ) or non-payment of bag seizures and stalking by court enforcement to forced detention. The only ones who have reacted is the paediatrician's practice in Bergneustadt.

Do you still belong to a cultured society that can act in mutual respect?

Heinz Fassbender

## It's getting worse and worse – you always have to get to the top!

[LVR Director Ulrike Lubek, Phone: 0221 809-2606, Fax 0221 8284-0171, E-Mail: \[landesdirektorin@lvr.de\]\(mailto:landesdirektorin@lvr.de\)](#)

Dear LVR Director Ulrike Lubek,  
I will leave you an e-mail to the LVR-Klinik Bonn, its press office and the press office of your hospital. At the same time, I think it is more than rude that the receipt of my mail has not yet been confirmed despite being requested. It is a scandal how the LVR clinic treats a mother without having heard her and has thus written a death sentence on the entire Haddad family. I would like to ask you, as a mother and as a representative of the Landscape Association, to clarify this terrible matter and perhaps even to come closer to my proposal that there be a meeting of doctors and psychologists in order to avoid such death sentences and rather to put in place all means and support so that families can stay together. I myself was in public home education in the 1970s and I know what I'm talking about. Please at least confirm the receipt of my/this mail. Thank you very much.

**Subject:** Aw: AW: Call for reflection on your Misdiagnoses (Pat. ID: 69123)

Mr. Döring and the others,

To your standard answer, a question: Are you actually so humanly and morally jaded that you no longer notice what these systemically relevant and brutalized civil servants and civil servants – old spirits – are doing to the population and the families in this country who are being torn apart? What kind of ugly face (grimace) is shown here every day, also in other cases?

They all provoke the repetition of history that the regional associations and the „Jugendamt“ s had to experience as early as the 1970s, when there were home revolts and demonstrations against the „Jugendamt“ s everywhere in "public education" and the APO and later the RAF developed from this.

None of you have learned from the history of the Brauweiler Labour Institute before 1933 and during the National Socialist era, from which you mendacally erected a "memorial". They are incapable of coming to terms with all their actions in direct connection between 1944 and February 1945 in Brauweiler, where two special detachments of the Gestapo were stationed. Non-conformist youths, who in many places in the Rhineland and the Ruhr area use the edelweiss as a distinguishing mark, were "cared for" there. They became known as the "Edelweiss Pirates" after the end of World War II. Other victims of the Sonderkommando's persecution actions were conscientious objectors in hiding, alleged "looters", "criminals" and opponents of National Socialism.

**"Euthanasia" program: The "racial hygiene" of the National Socialists. Today, through the diagnoses of experts, doctors and psychologists are on the rise again. And then didn't want to have known anything.**

What is already being carried out against children and young people today, by the supposedly oh-so-concerned institutions, employees and doctors, is to be equated with the actions of National Socialism. Today, National Socialism is called the "democratic state under the rule of law" and its perverse "data protection" – as the protection of public officials and the requirement to carry on as if nothing had happened.

I have no understanding at all about your disregard for my concern – to clarify how and in what form we can break this brutalization of public service employees against people who cannot defend themselves. This ugly, humanly contemptuous way of thinking.

Society is seething mightily because of its mendacious attitude of continuing to keep participation and democracy in the cage. The people who are harmed by their horrible attitudes are no longer willing to put up with this and will always hold them accountable. "I didn't know" – then no longer applies!

by Heinz  
Faßbender

**Oh, that's right! Oh, that's how it goes! Now not alleged data protection, but because of the danger that the truth could come out in a procedure to establish the truth. Then the child must no longer be heard – for he could be telling the truth: – "YOU ARE ALL TO BLAME!" –**

Therefore, the child's parents write a complaint to this notorious Bergisch district court GL and reject the judge Gundula Bayer on the grounds of bias.

**The letter, short and sweet, has it all!**

An appeal is filed against your decision of 12.04.2024 not to hear my child XXX Haddad born 12.09.2018 in the family law case in order to explore the will of the child independently of any alleged trauma counsellors. It is denied with ignorance that the employee of the LVR Clinic has such additional training or qualifications. Sonja Löw from Bergisch Gladbach is also ignorant of this training.

Incidentally, the alleged "diagnosis" is clearly a diagnosis of convenience for the paying staff of the „Jugendamt“ , namely the Schorre family from Gummersbach, who want to continue to withhold my child from me for no reason in order to be able to make a good "business" with it personally. Because an assumed "lack of commitment" brings the paying staff about 800 € more per month, as I was told from a reliable source.

If my child is as "sick" as described, and has been in the hands of the " „Jugendamt“ " for more than two years now, then the oh-so-great family court should explore what happened to the child during this time of alienation.

Therefore, as a mother, I have to assume that my child should not be heard because you all have something to cover up and **you** are the real and child welfare endangerer.

Under my care, my child would never have gotten so sick. The fact that you have the audacity to accuse my partner, the child's father and me

as a mother of violence against my child is a bottomless impertinence. If this allegation is not withdrawn, I will sue for injunctive relief and file a criminal complaint for defamation.

**For the rest, I oppose Judge Gundula Bayer on grounds of suspicion of partiality.**

She, the judge, knows exactly that my child has only suffered psychological and physical damage because with a brutal and malicious penetration of lies by the „Jugendamt“ and other accomplices, the legally stipulated visiting contacts were downright thwarted and these enormous alienation damages to my child are now being blamed on me in the form of a reversal of guilt.

Haddad Lamia

**Now all these alleged "child welfare providers" and made-up diagnoses can think about what you have done with your false insanity. The "hearing" was adjourned for the time being. Until the next child abduction? Then, as before, children and people can be attacked again – just like in the old days! German history repeats itself in a meaner and more subtle way.**
